DETAILED ACTION

Reason For Allowance

1. Claims 1,3-11,13-21 and 23-33 are allowed.
2. Following is an examiner's statement of reasons for allowance:

The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claim(s), in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims 1, 11, 21, 29 and 30, which include (claims 1, 21, 29, 30) a circuit for controlling the number of mirrors that reflect the light into an optical path that intersects a location of the pixel based on an intensity for pixel; (claim 11) method for controlling the number of mirrors that reflect the light into an optical path that intersects a location of the pixel based on an intensity for pixel.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ernstoff et al. (U.S. Pat. 5,903,323 A) discloses a mirror array (item 15) to form a projected image comprising pixels; and a circuit (item 20) to, for each pixel, the timing and control circuit selectively activate a particular DMD elements to provide the desire gray scale intensity for each pixel on screen; however, Ernstoff et al. does not teach or fairly suggest a circuit for controlling the number of mirrors that reflect the light into an optical path that intersects a location of the pixel based on an intensity for pixel.
